Submission Guidelines

- **Time Window:**

You can complete the task any time between 10:00AM to 10:00PM on the given day Submission closes at 10:00 PM.

- **Self-Research Allowed:**

You are free to explore, Google, or refer to tutorials to understand concepts and complete the task effectively.

- **Debug Yourself:**

Try solve all errors by yourself. This helps you learn problem-solving and ensures you don't face the same issues in future tasks.

- **No Paid Tools:**

If the task involves any paid software/tools, do not purchase anything. Just learn the process or find free alternatives.

- **GitHub Submission:**

Create a new GitHub repository for each task. Add everything you used for the task - code, datasets, screenshots (if any), and a short README.md explaining what you did.

- **Submit Here:**

After completing the task, paste your GitHub repo link and submit it using the link below:
